

## 2025 ENVIRONMENTAL POLICY

Aquaspersions Ltd. (UK) is committed to operating in an ethical and responsible manner. We recognise and seek to proactively manage the business aspects and impacts on the environment within our operations and more broadly in regards of raw materials, energy usage, waste creation, pollution prevention and supply chain.

Aquaspersions are committed to applying processes for continual improvement of our environmental performance with the aim to go **beyond compliance. We are committed to achieving carbon net zero by 2050.**

Aquaspersions shall ensure that this policy continues to be appropriate to the purpose and context of the organisation by reviewing this policy at least annually and update and revise when appropriate change occurs.

Our 2025 Environmental objectives are based around our significant environmental aspects:

### 1. Reducing Energy Use

Aquaspersions aims to minimise energy use throughout our operations. To achieve this, we will develop an Energy Management System and improve the energy efficiency of our production processes. Development of our production processes will consider energy efficiency as a key element in the decision-making process.

We are committed to reducing our energy consumption rate by 5% based and will begin to implement a management system in 2024 which meets the requirements of ISO50001.

### 2. Emissions/GHG

We are committed to reducing our overall environmental impact and greenhouse gas emissions. To do this we will continue to understand our Scope 1, 2 and 3 emissions and set SBTi's to meet our Carbon Net Zero target of 2050.

### 3. Reducing water use and effluent waste.

We are committed to reducing the amount of water we use. In 2025 we continue to identify opportunities to reduce the amount of water used for non-product-based activities and implement actions to reduce our water efficiency rate by 5% based on the 2024 rate.

In addition, we aim to reduce our effluent efficiency rate by 5%, based on the 2024 rate, by changing our processes and engaging with our staff.

### 4. Environmental, Social and Governance (ESG)

We are committed to improving our ESG ratings with Ecovadis and Athesis. The listed objectives will assist in the continuous improvement of our performance.
